New luxurious and
stylish design

All MITSUBISHI ELECTRIC Inverter Technology

The GR Series features advanced inverters that utilize MITSUBISHI ELECTRIC's cutting edge technology, developed worldwide through many years of experience. We have achieved powerful cooling with high energy efficiency, to bring you optimal comfort.

01 MITSUBISHI ELECTRIC Inverter Power Module

The Inverter Power Module is the brain of the air conditioner. It minimizes power consumption by adjusting the frequency.

02 MITSUBISHI ELECTRIC Propeller Fan and DC Fan Motor

Propeller Fan

The newly designed propeller fan maximizes airflow efficiency. It delivers more air volume with less noise.

DC Fan Motor

A highly efficient DC fan motor drives the fan of the outdoor unit. Efficiency is much higher than an equivalent AC motor.

03 MITSUBISHI ELECTRIC Compressor

The compressor is the heart of the air conditioner. Employing MITSUBISHI ELECTRIC's own technology, we are able to achieve both high efficiency and high power.

Poki-Poki Motor

Dramatically enhanced motor efficiency utilizing original dense winding technology

Heat Caulking

The original heat caulking method minimizes cylinder distortion for even greater efficiency.

Fast Cooling

Mitsubishi Electric, a global leader in air conditioning, understands its customer requirement better than anyone else.

At Mitsubishi Electric, we invest great care in designing our product features. Instant relief from scorching heat is one such desire met successfully through the Fast Cooling feature in our air conditioners provided just at the click of a button.

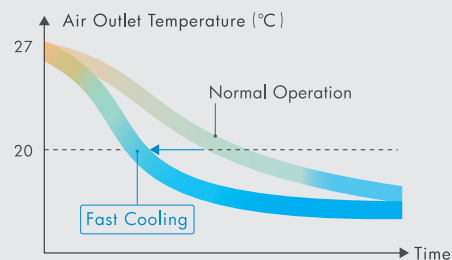

01 Compressor Frequency image

Pressing the Fast Cooling button makes the compressor reach its maximum frequency remarkably faster than in Normal Operation.

02 Air Outlet Temperature

Lowers the air outlet temperature faster than Inverter Normal Operation.

03 Thermography

Quickly cools the room with the highest-volume, and low-temperature airflow at 2 min. after operation.

04 Fast Cooling button

Once activated, this mode continues for 15 minutes.

Fast Cooling mode starts immediately with the push of a button. According to preference, air direction can be changed freely.

Long airflow

Delivers substantial and comfortable airflow

Projects air current up to 12 meters. Suitable even for living rooms.

Model comparison

- MSY-GR10/13/15VF 8 m
- MSY-GR18/22/26VF 12 m

* It's available when air direction horizontal and fan speed S-Hi.

Auto Vane Control Up and Down/Left and Right

Auto vanes can be moved left and right, and up and down using the remote controller.

Left & Right

Auto vanes can be set at 6 position and swing.

* Not available for MSY-GR10/13/15VF

Up & Down

Auto vanes can be set at 5 positions and swing.

Dual Barrier Coating

Dual Barrier Coating prevents dust and greasy dirt from getting into the air conditioner

State-of-the-art coating technology

Dirt is generally classified into two groups. Dual Barrier Coating works as a two barrier coating with blended "fluorine particles" that prevent hydrophilic dirt penetration and "hydrophilic particles" that prevent hydrophobic dirt.

Micro Particle Catching Filter (Optional) and High Density Filter (Optional)

Effectively eliminate PM 2.5 and catch smaller dusts.

Effectively catches floating PM2.5 particles to maintain clean air in the room.

[Comparison of Density of filters]

High Density Filter can prevent smaller dust from entering the inside of air conditioners.

Quiet Operation

The indoor unit level is as low as 18 dB (A) offering a peaceful indoor environment.

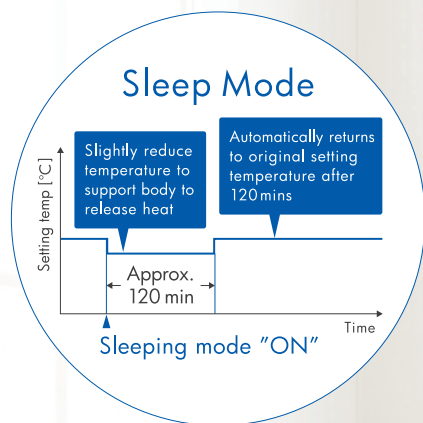

(Model GR10)

Aerodynamics Technology

Realizing the quietest room air conditioner, MITSUBISHI ELECTRIC have ever launched.

(Model GR10)

Cross-Flow-Fan

Our unique Cross Flow Fan construction guides air smoothly along each rotating blade as it simultaneously takes in and expels air. This allows for highly efficient delivery of powerful and refreshing airflow.

Optimized aero design

Optimized aero design utilizing 2 horizontal vanes and fixing suitable position of lower vane.

New Remote Controller

New stylish and compact remote controller features easy-read big display and simple button position with fundamental functions.

LED Backlight with luminous button

Once the luminous backlight button is pressed, the setting can be easily checked in the dark.

Error code display

Error codes are displayed on the remote controller for trouble shooting.

* For the details, please refer to the operating Instructions

Simple and intuitive buttons

A Remote Controller That Fits You

Its compact design creates the perfect fit for your hand.

Mitsubishi Electric Quality

What is MITSUBISHI ELECTRIC Quality? MEQ represents our dedication to excellence in developing and manufacturing exceptional, eco-friendly home appliances, amazing industrial products, reliable public infrastructure systems and inspiring space technologies, which are truly out of this world. And there's so much more. When you see the MEQ logo, you know something good is being created.

Development

Taking into account the various harsh environments around the world, at MITSUBISHI ELECTRIC we have established uniquely strict quality control standards and various quality evaluation tests for our products.

Dropping Test

Electromagnetic Compatibility Test

Salt Spray Test

Anechoic Chamber Noise Test

Design

In order to ensure our customers can use our products with peace of mind and for a long time, we select high-quality durable parts, and invest great care when designing and assembling our products.

Ensure its reliable operation and preventing fire accident in case of short circuit.

Special coating prevents any damages from humidity and insects

MITSUBISHI ELECTRIC PCB can resist high voltage up to 450V.

MITSUBISHI ELECTRIC Inverter can be smoothly operated even in 198v~264V.

A special coating is applied to the heat exchanger to increase corrosion toughness.

Anti-rust painting and galvanized steel protect cabinet even under harsh environment.

Production

MITSUBISHI ELECTRIC makes full use of advanced production technology to efficiently produce top quality products. All of our products are inspected by experienced professionals.
